

# Did you know you could ride on a seahorse?

If you happen to be a Greek god.  
Or at the very least, have wings.

There are a lot of myths about seahorses. They don't blow smoke from their gills, for instance, and they don't mate for life. But seahorses **are** the only fish that have a neck. And the males **do** get pregnant and give birth.

For more incredibly vital seahorse stats and some practical seahorse husbandry information, please visit [Seahorse.org](http://Seahorse.org).

Your mileage may vary.
